1. Introduction

1.1 *Purpose*

The purpose of this document is to present a detailed description of the Go Zero Waste website. It will discuss the purpose, features, and interfaces of the website, what the website will do, and the constraints on its services.

1.2 *Intended Audience*

This document is intended for both stakeholders, which may include but not limited to researchers, organizations, casual users, and developer/s of the website.

1.3 *Intended Use*

This document will be used as a basis or a means to understand the idea and functions of the website and will serve as a guide for development.

1.4 *Scope*

This document will specify the requirements for the Go Zero Waste website. This website will be a Non-profit website for a client. It envisions to make zero waste a lifestyle that is built on respect for ecological limits and community rights, where resources are sustainably conserved. The website will be designed to reach a wide range of audience for the zero-waste advocacy, by providing a platform to publish articles and contents. The objective of the website is to provide more information about the causes and effects of pollution and the catalyst to the zero-waste movement.

The website will allow the owner to:

- Create and manage articles and contents to provide information.
- Connect with the people.

The website will allow the users to:

- access/read the articles/contents,
- search for article/content,
- be directed to petitions and donation sites,
- subscribe for notification of new contents,
- connect with the website owner through contact forms, and
- contact with the website owner via email address and/or social media accounts.

The articles, contents, and/or contact information will be stored in and can be accessed and retrieved in a database.

1.5 Definitions and Acronyms

Table 1. Definitions and Acronyms

Term	Definition
Article	A document published on the website and is stored in a database.
Database	It is where the collection of all information used by the website are stored.
Stakeholders	Any person with an interest in the project aside from the developer.
User	Anyone visiting or using the website to read and look for articles and/or contents.
Website Owner	A person that owns and manage the website.

2. Overall Description

2.1 *User Needs*

The website will be used by the users and website owner. The users can use the website for researching, reading, donating, and connecting with people who share the same advocacies. Users shall be able to search, access, and read articles, donate, subscribe to newsletter, and contact the website owner. In addition, the website owner shall be able to create and publish articles/contents, manage and control the website, and shall have the right to access the database.

2.2 *Assumptions and Dependencies*

The website is aimed to be able to provide key information relating to the environment and other relating issues, and is directed to the community of researchers, organizations, casual users, and others. Thus, the following assumptions will be made.

- The user is expected to be internet literate and has the common knowledge on how to navigate the website.
- The user is expected to be internet literate and has the common knowledge on how to use functionalities like the search function. Where the main and other pages will have the search function available at the footer section.
- The user is expected to be internet literate and is able to use the contact form and subscribe to newsletter feature.
- The user is expected to be internet literate and is able to use the sign petition and donation feature.
